

What makes Eye LASIK Austin unique?

Eye LASIK Austin is the facility of choice for thousands of Central Texas patients and nearly 175 eye doctors since 2000. What drives this success? Simply put, Eye LASIK Austin is central Texas' LASIK authority. Our incredibly skilled staff, advanced technology, and a true care for our patients' needs are what set us apart. Our cutting edge technology and vision experts at Eye LASIK Austin can treat essentially any refractive eye condition.

1 We Work With Your Optometrist

We realize that no one knows your eyes as well as your own eye doctor, which is why we partner with optometrists all over Central Texas, keeping you with YOUR doctor!

2 The Most Advanced Technology Available

Not all LASIK is the same and Eye LASIK Austin has been performing all laser procedures (no blades) for over 10 years. We offer some of the most advanced eye surgery procedures currently available with most cases taking less than 15 minutes!

Advanced HD Technology

Originally developed for high-powered telescopes

25X More Precise

25X more precise than conventional measurements used for contacts & glasses

Eye-Mapping Technology

Creates a 3D map of your eye's unique imperfections

Over 1,200 Points of Data

Captures over 1,200 points of data from each eye to create the highly accurate 3D map

More Than 8 Million

LASIK Flaps created safely using IntraLase® Technology

3X Stronger & More Stable

Flaps compared to blade-created flaps

#1 Technology Choice

For flap creation by LASIK surgeons and the military

88%

Of all LASIK flaps in the U.S. are created using a Femtosecond laser

Tracking Complex Eye Movement

The most advanced 3D eye tracking system, capable of compensating for virtually all eye movements, including eye cyclorotation.

Iris Recognition Technology

The shape, color and contour of your iris is completely unique – just like your DNA.

New Levels of Accuracy & Precision

Technology that matches your eye's measurements to the features of your iris. The laser matches up the features of your iris to the master plan and then delivers that laser plan with pinpoint accuracy.

3 VSP Vision Insurance

While VSP Vision Insurance is the most common plan in the U.S., only three offices in Austin accept it. Eye LASIK Austin is one of them.

4 We Are A Paperless Office

Eye LASIK Austin is all about the conservation of our natural resources. Not only does going paperless help reduce our carbon footprint, but going all digital creates a more efficient office, which translates to a more pleasurable experience for our patients!

5 Interest-Free Financing for 24 Months

Eye LASIK Austin offers multiple convenient options for financing your procedure, making LASIK affordable for almost everyone.
